

PROFESSIONAL SUMMARY

Full Stack Developer with 6+ years of experience building scalable, cross-platform applications using Flutter, Angular, and Node.js. Skilled in architecting end-to-end solutions, leading teams, and writing clean, testable code following SOLID principles.

WORK HISTORY

Quantiphi Analytic Solution Pvt Ltd - Senior Software Engineer

Mumbai, Maharashtra

10/2021 - Current

- **Architected and led development of scalable mobile apps using Flutter**, applying SOLID principles and selecting BLOC or Provider strategically based on app complexity and team expertise—improved operational efficiency by 40%
- **Implemented unit and UI tests in Flutter using flutter_test and mockito**, ensuring business logic accuracy and visual consistency across the app
- **Drove adoption of GetX for lightweight modules**, improving navigation performance and reducing overhead in specific flows, while maintaining architectural consistency across the app
- **Led frontend architecture for Angular apps using RXJS and TypeScript**, improving reactive data handling, collaborating closely with UX teams, and establishing reusable design patterns to enhance developer velocity
- **Designed and maintained scalable RESTful APIs using Node.js and Express**, applying clean architecture, versioning, and middleware layering to support multi-platform consumption
- **Owned backend infrastructure tasks**, including cloud function development, CI/CD automation, and monitoring/logging pipelines—ensuring seamless and resilient production deployments
- **Managed and mentored a cross-functional team of 4+ developers**, conducting code reviews, architecture sessions, and sprint planning, resulting in a 25% improvement in on-time delivery and cross-team alignment

smartData Enterprises (I) Ltd - Associate MEAN Stack Developer

Nagpur, Maharashtra

01/2021 - 09/2021

- **Contributed to 80% of core application features** using Angular and Flutter, directly improving user engagement and ensuring a smooth cross-platform experience
- **Worked closely with UI/UX designers, backend engineers, and product managers**, resulting in a 25% improvement in team collaboration and feature delivery speed
- **Led a small team of 4 developers (mobile and web)** during project execution, coordinating tasks and supporting on-time milestone completion
- **Created documentation outlining system design and implementation details**, improving cross-team understanding and technical onboarding

SKILLS

Frontend: Flutter (Android, iOS), Angular, JavaScript, TypeScript, Tailwind CSS, Figma

Backend: Node.js, FastAPI, Python, Firebase Cloud Functions

Database: MongoDB, PostgreSQL

Testing & Tools: Jest, Git

Additional: GenAI integration, Machine Learning, Data Analysis

CERTIFICATIONS

Udemy-Python For Data Science and Machine Learning

ADDITIONAL SKILLS

Machine learning
Data analysis
Reading Research paper
Creating Apps using Gen AI models

EDUCATION

06/2017

RTMNU

Wardha, India

Bachelor of Engineering:
Information Technology

- **Assisted with backend development using Node.js and Express**, integrating frontend components with backend services and supporting API endpoints

Heta Datain - Software Engineer

Nagpur, Maharashtra

01/2018 - 01/2021

- **Led development of an energy monitoring system from the ground up** using Flutter (mobile) and Angular (web), enabling real-time tracking, data visualization, and analytics
- **Reduced energy usage by 42% in hospitals and 18% in manufacturing units (KWH/Job)** through smart tracking and insights powered by user-friendly interfaces
- **Built full-stack features using Node.js and Express**, managing API integrations, real-time data processing, and scalable backend pipelines
- **Collaborated closely with founders, designers, and early clients**, helping shape product direction, user workflows, and feature priorities in a fast-moving startup environment
- **Owned end-to-end delivery**, from architecture and development to deployment and client demos gaining deep, hands-on experience across the entire product lifecycle
- Took initiative in writing internal documentation and establishing early development best practices, accelerating onboarding for new engineers
